Introducing the UK's most affordable Smart EV Charger

Our mission is important

We are removing the barrier to electric vehicle ownership by providing an affordable electric vehicle charging solution for everyone

With the world transitioning towards electric vehicles at an increasingly rapid rate, there is an accelerating demand for accessible charging infrastructure. evec offers an affordable EV charging solution to target everyone from entry-level to luxury electric vehicle owners.

Who we are...

Meet our board of directors

Stephen Johnson
Owner and CEO

sustainability

is at the heart of
everything we do.

Travel shouldn't cost the earth – and in our attempt to tackle climate change, we have manufactured an affordable EV charger that'll help drive our way to a greener, electric future.

In our pledge to tackle deforestation, we have partnered with brands such as Cool Earth and Earthly to help us on our way to becoming a Climate Positive Business.

evtec chargers are
compatible with **ALL**
EV and PHEVs

Universal product features

Safety

All of our chargers come with Protective Earth Neutral Protection, Over Current Protection and Residual Current Protection as standard

Durability

All charging units are up to IP65 compliant and can withstand temperatures from -25°C to 50°C making them highly durable

Reliable

All of our chargers comply with local standards, UK protection requirements and are covered by evtec's 3-year warranty

Power

Our chargers are available up to 22kW through either single-phase or three-phase power

Connectivity

Evtec charging app with Bluetooth and WiFi connectivity

Compatibility

Our untethered models are both Type 1 and Type 2 compatible

Download our fancy app, **it's free!**

Simple to use and easy to set up, our app gives you full control over your EV charging, allowing you to...

Turn on & off

Schedule charging

View charge status

Monitor usage

Enter manual mode for simple plug & play

Chargers and accessories

Single-Phase Untethered Charger

VEC01

Our universal single-phase VEC01 is an affordable fully featured EV and PHEV charger that is perfect for your home. Despite its low cost, it's a compact, modern unit that doesn't compromise on quality and is entirely compatible with all electric and plug-in hybrid vehicles.

Power
3.7 kW – 7.4 kW

Compatibility
Type 2 Socket to Type 1 and Type 2 Inlet Port

Three-Phase Untethered Charger

VEC02

Our universal three-phase VEC02 is an affordable, fully featured EV and PHEV charger that is designed for a three-phase power supply that is usually found in commercial environments like the workplace. This enables the charger to charge the vehicle at up to 22kW's, significantly faster than the domestic home version VEC01. Despite its low cost, it's a compact, modern unit that doesn't compromise on quality and is entirely compatible with all electric and plug-in hybrid vehicles.

Power
22 kW

Compatibility
Type 2 Socket to Type 1 and Type 2 Inlet Port

Single-Phase Tethered Charger

VEC03

Our single-phase VEC03 is an affordable fully featured EV and PHEV tethered charger that is perfect for your home. Despite its low cost, it's a compact, modern unit that doesn't compromise on quality and is the perfect way to charge your Type-2 EV or PHEV. Better yet, pair the Tethered Charger with our wall cable holder to keep your cable organised and secure while it's not in use.

Power

3.7 kW – 7.4 kW

Compatibility

Type 2

Three-Phase Tethered Charger

VEC04

Our three-phase VEC04 is an affordable fully featured EV and PHEV Tethered Charger that is designed for a three-phase power supply, normally found in commercial environments like the workplace. This enables the charger to charge the vehicle at up to 22kW's, significantly faster than the domestic home version VEC03. It's a compact, modern unit that doesn't compromise on quality and is the perfect way to charge your Type-2 EV or PHEV. Better yet, pair the tethered charger with our wall cable holder to keep your cable organised and secure while it's not in use.

Power

22 kW

Charger bag

Untethered charge cables can be easily stored and transported when not in use.

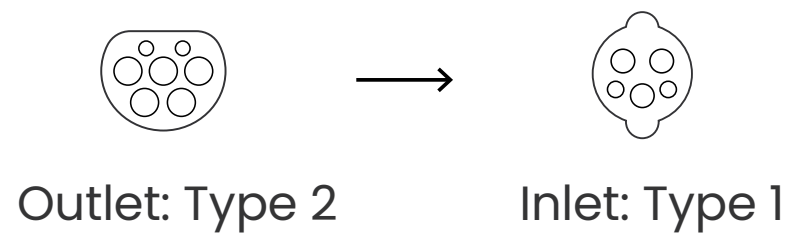

Cable holder

Tethered charge cables can be safely stored when not in use.

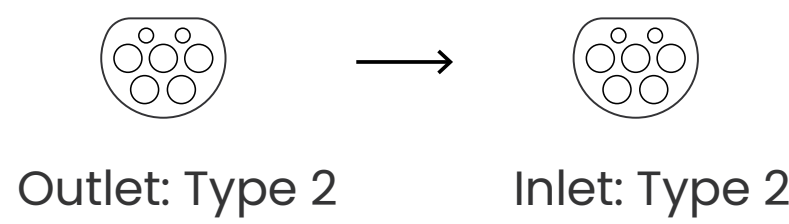

Type 2 – Type 1 Cable

There is a single-phase cable available to charge Type 1 PHEV's and EV's from untethered Type 2 chargers.

Type 2 Cable

Additional charging cables are available that work with either the single-phase or three-phase untethered boxes.

Caravan chargers

Caravan homes can be easily converted into mobile EV charging points

Using dynamic load balancing, evec's chargers can efficiently balance the energy used to charge an EV alongside any electrical power being used within the site. This balance can be monitored through the evec app.

Trade installation

Become an **even approved installer** and work with the UK's fastest growing charge point manufacturer. For more information, please get in touch:
